RE: HIMSS Post Travel Report

SUMMARY:

Last week, (March 5-8) I traveled to Las Vegas to attend the annual conference of the Health Information Management Systems Society (HIMSS). In total, about 20 Congressional staff attended the conference, along with select staff from federal agencies — CMS and ONC. I primarily focused on educational sessions and exhibits related to health IT interoperability, cybersecurity, data sharing and analytics, and the application of health technology to federal programs such as Medicare and Medicaid.

Monday, March 5, 2018:

March 5:

Arrived in Las Vegas at noon. Attended pre-conference sessions on cybersecurity and data systems for Health CIO's. Discussed with leadership of multiple organizations what the appropriate role of Congress should be in moving adoption of health technology forward. Attended the opening reception and the public policy dinner. Met the CEO of HIMSS.

March 6:

Attended a HIMSS Public Policy Committee breakfast. Attended the CMS leadership speech on data sharing in federal health programs. Attended the federal health community lunch. Attended a session on connected care. Held business meetings with Amazon and GE Health. Attended a session on opioids. Attended a session with ONC on interoperability and TEFCA. Went to dinner with the Congressional attendees.

March 7:

Attended the HIMSS Public Policy Leaders Breakfast. Talked with Utah state officials on health IT. Attended the interoperability showcase. Held business meetings throughout the day with Epic, Impravata, Cerner, Intel, IBM, Intermountain Healthcare, KLAS, and UHIN (the last 3 are Utah organizations attending the conference). Attended educational session on exchange of health information. Attended educational session on population health. Went to the Federal Health Community Reception. Flew back to DC.

Pre-Travel Filing Instructions: Complete an	d submit this form at least 30 days
prior to the travel departure date to the Select	Committee on Ethics in SH-220.
Incomplete and late travel submissions will n e	of he considered or approved. This
form must be typed and is available as a fillab	le PDF on the Committee's website
at ethics.senate.gov. Retain a copy of your er	tire pre-travel submission for your
	tine pre-traver succiniosion for jour
required post-travel disclosure.

Form RE-1

PRIVATE SPONSOR TRAVEL CERTIFICATION FORM

This form must be completed by any private entity offering to provide travel or reimbursement for travel to Senate Members, officers, or employees (Senate Rule 35, clause 2). Each sponsor of a fact-finding trip must sign the completed form. The trip sponsor(s) must provide a copy of the completed form to each invited Senate traveler, who will then forward it to the Ethics Committee with any other required materials. The trip sponsor(s) should **NOT** submit the form directly to the Ethics Committee. Please consult the accompanying instructions for more detailed definitions and other key information.

The Senate Member, officer, or employee MUST also provide a copy of this form, along with the appropriate travel authorization and reimbursement form, to the Office of Public Records (OPR), Room 232 of the Hart Building, within thirty (30) days after the travel is completed.

•	nsor(s) of the trip (please list all sponsors): Ithcare Information and Management Systems Society (HIMSS)
Desc	This is an educational experience to attend the HIMSS18 Annual Conference and
Exh	ibition for education, innovation and collaboration on health information and technology.
Date	es of travel: March 5 - 8, 2018
Plac	e of travel: Las Vegas, NV
Nan	ne and title of Senate invitees: Please see attached list of Senate invitee
I cer	tify that the trip fits one of the following categories:
	(A) The sponsor(s) are not registered lobbyists or agents of a foreign principal <u>and</u> do not retain or employ registered lobbyists or agents of a foreign principal <u>and</u> no lobbyist or agents of a foreign principal will accompany the Member, officer, or employee at any point throughout the trip. -OR-
,	(B) The sponsor or sponsors are not registered lobbyists or agents of a foreign principal, but retain or employ one or more registered lobbyists or agents of a foreign principal and the trip meets the requirements of Senate Rule 35.2(a)(2)(A)(i) or (ii) (see question 9).
	I certify that the trip will not be financed in any part by a registered lobbyist or agent of a foreign principal. - AND-
	I certify that the sponsor or sponsors will not accept funds or in-kind contributions earmarked directly or indirectly for the purpose of financing this specific trip from a registered lobbyist or agent of a foreign principal or from a private entity that retains or employs one or more registered lobbyists or agents of a foreign principal.
X	The trip will not in any part be planned, organized, requested, or arranged by a registered lobbyist or agent of a foreign principal except for de minimis lobbyist involvement. - AND -
X	The traveler will not be accompanied on the trip by a registered lobbyist or agent of a foreign principal

except as provided for by Committee regulations relating to lobbyist accompaniment (see question 9).

9.	USE ONLY IF YOU CHECKED QUESTION 6(B) I certify that if the sponsor or sponsors retain or employ one or more registered lobby ists or agents of a foreign principal, one of the following scenarios applies:
	(A) The trip is for attendance or participation in a one-day event (exclusive of travel time and one overnight stay) and no registered lobbyists or agents of a foreign principal will accompany the Member, officer, or employee on any segment of the trip.
	(B) The trip is for attendance or participation in a one-day event (exclusive of travel time and two overnight stays) and no registered lobbyists or agents of a foreign principal will accompany the Member, officer, or employee on any segment of the trip (see questions 6 and 10).
	(C) The trip is being sponsored only by an organization or organizations designated under § 501(c)(3) of the Internal Revenue Code of 1986 and no registered lobbyists or agents of a foreign principal will accompany the Member, officer, or employee at any point throughout the trip.
10.	USE ONLY IF YOU CHECKED QUESTION 9(B) If the trip includes two overnight stays, please explain why the second night is practically required for Senate invitees to participate in the travel:
11.	An itinerary for the trip is attached to this form. I certify that the attached itinerary is a detailed (hourby-hour), complete, and final itinerary for the trip.
12.	Briefly describe the role of each sponsor in organizing and conducting the trip:
	HIMSS develops, organizes, and conducts all aspects of the trip and conference. HIMSS18 is the largest
	healthcare conference, bringing together thought leaders from across the healthcare community, including
	providers, IT experts, vendors, and local, federal and state government representatives.
13.	Briefly describe the stated mission of each sponsor and how the purpose of the trip relates to that mission:
	HIMSS is a global, caused-based not-for-profit focused on transforming health through information and
	technology. HIMSS provides thought leadership, community building, and professional development, and
	leads efforts to optimize health engagements and care outcomes using information and technology.
14.	Briefly describe each sponsor's prior history of sponsoring congressional trips:
	HIMSS holds in Annual Conference every year, and invites congressional staff, as well as federal, state,
	and local policymakers and officials, for this unique learning experience.

Additional Information

Question 5. U.S. Senate Invitees:

- Brett Baker (Senate Finance Committee)
- Morgan Brand (Sen. Schumer)
- Andrew Burnett, Health Research and Policy Assistant (Senate HELP Committee)
- Jennifer DeAngelis (Sen. Whitehouse)
- Eric Dempsey (Senate Finance Committee)
- Will Dent (Sen. Isakson)
- Marvin Figueroa (Sen. Warner)
- Victoria Flood (Sen. Capito)
- Julia Frederick (Sen. Warren)
- Matt Gallivan (Sen. Cassidy)
- Colin Goldfinch, Senior Health Policy Adviser (Senate HELP Committee)
- Jordan Grossman (Sen. Klobuchar)
- Rita Habib (Sen. Bennett)
- Samantha Helton (Sen. Wicker)
- Elizabeth Henry, Legislative Assistant (Sen. Cochran)
- Virginia Heppner, Professional Staff Member (Senate HELP Committee)
- Will Holloway, Legislative Assistant (Sen. Hatch)
- Danielle Janowski (Sen. Thune)
- Lauren Jee (Sen. Cardin)
- Elizabeth Joseph (Sen. Cochran)
- Adam Lachman (Sen. King)
- Kathleen Laird (Sen. Baldwin)
- Aisling McDonough, Health Legislative Assistant (Sen. Schatz)
- Bobby McMillin, General Counsel (Senate HELP Committee)
- Brett Meeks, Health Counsel (Senate HELP Committee)
- Madeleine Pannell (Senate HELP Committee)
- Lauren Paulos (Sen. Hatch)
- Stuart Portman, Health Policy Adviser (Senate Finance Committee)
- Lorenzo Rubalcava (Sen. Stabenow)
- Kristi Thompson (Senate HELP Committee)
- Beth Vrabel (Senate Finance Committee)
- Arielle Woronoff, Senior Health Counsel (Senate Finance Committee)

Question 23. Note: No alcohol will be provided or served to Senate staffers, as noted on the agenda.

Congressional Staff Agenda

Location: Sands Expo Center, Las Vegas, NV March 5 - 9, 2018

Monday, March 5 th , 2018		
11:38am Flight arrives in Las Vegas		
8:00 AM - 4:30PM	Full Day Preconference Symposia and Workshops (ongoing for 8 hours):	
Breakdown:	Business of Healthcare Symposium: Going from Good to Great in a Value-Based World	
8:15-9:15am – education session	The transition from fee-for-service to pay-for-value payment models is one of the greatest financial challenges the U.S. healthcare system faces. Realizing the full potential of these arrangements requires a level of communication, information sharing, and data integration never contemplated in our historical	
9:30-10:30am - education session	fee-for-service world. Explore how some of the most successful organizations are navigating these previously uncharted waters by reimagining their patient engagement strategies, contracted provider arrangements, and approach to data analytics, as well as the legal issues that must be taken into	
10:45-11:45am - education session	consideration when executing these new strategies. OR	
11:45am- 12:45pm – lunch 12:45-1:45pm – education session 2-3pm – education session	Innovation Symposium: Innovation as a Strategic Imperative	
3:15-4:15 — education session	Interoperability and HIE Symposium: Facilitating Person-Centered Interoperable HIE to Manage Complex Populations Patients' lives, the health and security of our nation's citizens, and the health of the US economy are - in part - reliant on ensuring the right people have the right access to the right health information at the right time. While we have made great strides over the past generation, seamless, secure, nationwide interoperable health information exchange continues to elude us. Although there have been major investments and policies designed to drive standards development, interoperability, and health information exchange, significant barriers and challenges exist. Explore how points of leverage in technology and policy can be used to exploit market-based solutions to this dilemma. A particular focus is current solutions to the requirements of serving complex	

patients in the context of population health management and new reimbursement models. Because semantic interoperability is not the norm, challenge today's proven solutions and frameworks, and explore cutting-edge ideas in interoperability that will transform the exchange of health information. Is the future of healthcare destined to be incremental or will innovation and economics drive a great leap forward? Take a closer look at the interaction of technologies with policies, payment reform, emerging standards, and use cases that are furthering our progress toward true healthcare transformation in an interoperable world.

Coordinated and Connected Care Symposium: Tackling the Challenge of Connected and Coordinated Care

Today's healthcare ecosystem is embracing a collaborative, person-centric approach to care throughout all stages and aspects of life. Care teams increasingly incorporate formal and informal members from many organizations and include family members, friends and others from outside the healthcare system. This shared decision-making is increasingly information-driven and interdependent, and ensuring coordination is challenging. Discover strategies for identifying and tackling these challenges, including leadership roles, technical skills, and IT and management strategies.

OR

Long-Term and Post-Acute Care (LTPAC) Symposium: Digital Health in and with LTPAC Settings

Long-term and post-acute care (LTPAC) provider organizations have long played an important yet frequently overlooked role in the U.S. healthcare delivery system. Now, as LTPAC organizations are elevating in prominence in the current healthcare ecosystem via ACOs and population health initiatives, there is a renewed interest in ensuring they have a visible presence in digital health. Following the Certified Associate in Healthcare Information and Management Systems (CAHIMS) certification roadmap, explore issues that LTPAC organizations should consider in leveraging digital health technologies to support their internal and external clinical data needs, and how hospitals, consultants and vendors can best address the specific digital health concerns and challenges of LTPAC organizations.

OR

Precision Medicine Symposium: Journey to the Summit Using Clinical and Business Intelligence

Precision medicine is a fast-evolving field of healthcare that is approaching the mainstream tipping point. Clinical and business intelligence (C&BI) is instrumental in transitioning precision medicine to routine care by delivering analytics, data interoperability and data sharing among the ecosystems' stakeholders (laboratories, health systems, pharma, EMR vendors, research and payers) to inform decision-making in the provider workflow. Explore the precision medicine journey to the summit using C&BI, including the current landscape, future vision, and stakeholder challenges and perspectives.

5:00 - 6:30 PM

HIMSS18 Opening Keynote

Technology for a Healthier Future: Modernization, Machine Learning, and Moonshots with Eric Schmidt, Executive Chairman of Alphabet Inc. (parent company of Google

6:30 - 8:00 PM	HIMSS18 Opening Reception
	Come celebrate to kick off our conference! Network your way through an evening with live music, food, and friendly conversation. Connect with industry leaders and colleagues alike at this special event open to all registered HIMSS18 conference attendees. **No alcohol will be provided or served to Senate staff**
7:00 - 9:00 PM	HIMSS18 Public Policy Leaders Dinner
	Location: TBD
	<u>Description:</u> Join policy leaders within HIMSS, as well as state and federal officials, for dinner to discuss policy matters including the health IT policy, legislative, and regulatory landscape in Washington, DC and the states. **No alcohol will be provided or served to Senate staff**

Tuesday, March 6th, 2018

h 6 th , 2018
HIMSS18 Exhibition Hall with live technology demonstrations,
presentations, and sessions
<u>Description:</u> Learn about cutting edge health information technology. Experience thousands of health IT products and services on the HIMSS18 exhibit floor. Features the Meaningful Use Experience — a special live demonstration area that lets the viewer experience proven, certified EHR solutions. Also experience firsthand the Social Media Center, HIMSS Interoperability Showcase, The Intelligent Hospital Pavilion and more.
Interoperability Showcase
<u>Description:</u> Explore a health ecosystem where standards-based health IT enables individuals to securely access, contribute to and analyze their own health data. Learn how current health IT products in the market deliver standards-based interoperability and health information exchange with an interactive learning experience.
Views from the Top – How CMS is Leveraging Information and Technology in Medicare and Medicaid CMS Administrator Seema Verma
Description: Administrator Verma is excited to discuss her efforts to advance interoperability and patient ownership of healthcare data, to most effectively leverage the latest technologies for patients in Medicare and Medicaid.
Concurrent Education Sessions:
Advancing Digital Health in Canada This session will share the Canadian experience to develop and implement a strategy to integrate clinical informatics competencies into the academic faculty curricula for Medicine, Nursing and Pharmacy. Canada has invested in the building of the electronic health record infrastructure since 2001, and in 2007, it was recognized that to build sustainable change in healthcare, the preparation of clinicians needed to be addressed as well. This award winning 10 year program began by establishing a governance and leadership structure for each faculty then building upon that to create a collaborative among all the faculties. In the course of developing discipline specific clinical informatics competencies, it was discovered that much of the content could be leveraged across the clinical faculties. A Peer to Peer learning approach

was implemented, with Faculty Peer Leaders taking responsibility to disseminate the competencies into curriculum and into clinical practice.

OR

Managing Medical Device Cybersecurity Vulnerabilities

Medical device cybersecurity continues to evolve. Multiple initiatives are working to improve device cybersecurity, to include development of a Common Vulnerability Scoring System (CVSS) rubric to assess device vulnerability impact and severity; the use of Information Sharing and Analysis Organizations (ISAOs) to help broker medical device vulnerability management; maturing coordinated disclosure processes; device cybersecurity criteria development and testing; and table top exercises to validate vulnerability handling procedures. This session will characterize these initiatives, as well as the relevant FDA and community roles, in helping to realize safer, more secure device clinical operation and use.

OR

A Framework to Support Measure Development for Telehealth

Telehealth offers tremendous potential to transform the healthcare delivery system by overcoming geographical distance, enhancing access to care, and building efficiencies. The Health Resources and Services Administration (HRSA) defines telehealth as "the use of electronic information and telecommunications technologies to support and promote long-distance clinical healthcare, patient and professional health-related education, public health and health administration". The U.S. Department of Health and Human Services (HHS) called upon the National Quality Forum (NQF) to convene a multistakeholder Telehealth Committee to recommend various methods to measure the use of telehealth as a means of providing care. The Committee was charged to develop a measurement framework that identifies measures and measure concepts and serves as a conceptual foundation for new measures, where needed, to assess the quality of care provided using telehealth modalities.

OR

Beyond the Pilot: Value-Driven Innovation

Many institutions experience "death by 1000 pilots," where cutting-edge technologies are implemented for a few months in a few departments, but lasting changes in workflow and culture are never realized. MD Anderson's first Chief Innovation Officer will explore ways to overcome the proverbial "wall of no" and "we've tried that before" attitudes that stifle innovation. Attendees will learn how to scope problems appropriately, which stakeholders to engage at each step of the innovation process, and how to differentiate true pilots from long-term solutions.

9:30 - 10:30 AM

HIMSS Staff Led Tour of the HIMSS18 Exhibition Hall

<u>Description:</u> To help familiarize attendees with layout of Exhibition Hall and key specialty areas, including Interoperability Showcase, Cybersecurity Command Center, Connected Health Experience, and Intelligent Health Pavilion

10:00 – 11:00 AM

Concurrent Education Sessions:

Enabling a Stronger, More Skilled Global eHealth Workforce
Discover how you can become part of the ongoing transatlantic initiative that is making eHealth work! Find out how the EU*US eHealth Work Project has

been collaborating over the span of 18 months to measure, inform, educate and advance health information technology, digital skills and interprofessional healthcare education on a global level. See the results of what the project has accomplished and hear how we will continue this important work on an ongoing basis through the HIMSS TIGER Initiative. Learn how you can become involved in this groundbreaking and innovative effort to empower the healthcare workforce with digital skills. Bring best practices, tools and resources developed through the project to your institutions. Hear how you and your organization can help educate and train staff, assist interdisciplinary professionals as they progress throughout their careers, and provide management and administration with valuable workforce development benefits now and in the future.

OR

Care Pathways and Data Analytics for Advancement of Healthcare

This session will discuss the intelligent automation and clinical workflow optimization that has allowed for the precise execution of what we already know to systematically marshal our people, processes and technologies which have made a profound difference in how to approach improving clinical and financial outcomes.

OR

Federal Health Community Forum Session

Government policymaking directly impacts healthcare transformation and health IT, and you need to know what to expect. Participate in the three focused sessions of the Federal Health Community Forum that are specifically designed for special audiences interested in discussing government health IT programs. Gain insight into key government health IT initiatives, plans, priorities, and opportunities.

OR

Office of the National Coordinator for Health IT (ONC) Session

The Office of the National Coordinator for Health IT (ONC) will be presenting on the work it is undertaking related to implementing the 21st Century Cures Act, including interoperability, information blocking, and the trusted exchange framework/common agreement as well as other critical issues in its portfolio related to standards, usability, and increasing health IT adoption and functionality.

OR

Optimizing Care Transitions Across the Continuum

Implementing a strategy to address transitions of care across a large integrated health network presents many challenges. Increased pressure to improve utilization rates along with new Transitional Care Management billing opportunities has incentivized health systems to find innovative, cost-efficient ways to ensure transitions occur safely and effectively. One large teaching hospital and health system prioritized a strategy to improve care provided to patients after being discharged. This session will discuss a two-fold approach to a cost-efficient model to address this strategy. First, a centralized Transition of Care call center was developed employing Registered Nurses and Medical Assistants who place calls to patients post-discharge; this model works on behalf of the primary care providers (PCPs). Secondly, the workflow for this process was streamlined using various functions within the EHR allowing for an increase in staff productivity.

Concurrent Education Sessions: 11:30 - 12:30PM Centers for Medicare & Medicaid Services (CMS) Session The Centers for Medicare & Medicaid Services (CMS) will be presenting on several critical topics in their sessions, including: the agency's quality and innovation work related to its health IT-related Medicare payment policies, including the Medicare Access and CHIP Reauthorization Act of 2015 (MACRA), Quality Payment Program (QPP), and the Medicaid funding opportunities that exist for providers as well as states in terms of interoperability and Medicaid modernization and modularization. OR The Impact of Smartphone Technology in Clinical Practice This session will discuss study findings and demonstrate how implementing a smartphone solution into clinical practice significantly improved physician response times, increased efficiency and transformed care team communication. OR Virtual Reality Gets Real in Healthcare Recent, real-world case studies in virtual reality (VR) hold promise for medical training as well as operational support. Organizations like the US Army, VA, medical schools, and private hospital systems are exploring new uses. VR is an umbrella term for other areas including augmented reality ("AR") and 3-D. VR and AR technology have advanced to the point where consumer facing immersive VR experiences are accessible at reasonable price points. So far, VR has gotten traction in healthcare mainly as a training and education device, but industry-wide it's a green field for innovation. We've only scratched the surface of VR's potential to disrupt healthcare delivery. New revenue, cost savings and quality gains can be captured from VR across multiple verticals-health system, provider, pharma, payer and consumer. VR can leverage techniques to weave itself into the fabric of healthcare deliverygamification, social media, narrative, visioning, goal setting and rewards. OR Engaging and Empowering Patients: Redesigning Patient Care This session will discuss how we transformed care coordination and the patient experience in our Maryland-based health system by implementing a patient engagement and care coordination platform supported by a fully enabled virtual care team. The program streamlined communication, collaboration and coordination among hospitalists, specialists and PCP's and implemented a well-defined patient engagement strategy. By sharing actionable health information, providing 24/7 access to virtual care teams and managing transitions of care, we achieved a 350% reduction in in-patient transfers, 100% completion of discharge follow ups within 48 hours, more than 50% reduction in readmission and 15% reduction in no-shows. Feedback indicates a vastly enhanced patient experience, improved quality of care and better outcomes. We will also discuss how remote patient monitoring using intelligent medical devices demonstrates significant potential to further these goals. Federal Health Community Lunch 12:00 - 1:00 PM Description: A community of HIMSS members and Federal Government

employees, coming together for cross-agency information sharing and networking, and to share new ideas on how health IT can be used to improve healthcare delivery by the federal government.

1:00 - 2:00 PM

Concurrent Education Sessions:

Human Factors and Workforce Solutions to Connected Care

The speakers will examine the enablers of, and barriers to, maximizing health IT work force and human factors in achieving progress as the nation moves toward a more distributed healthcare system by 2025. The speakers will provide an update on cross- sectoral discussions held as part of NEHI's "Healthcare Without Walls" project to identify work force and human factor challenges resulting from increased availability and utilization of digital health, telehealth, remote monitoring, artificial intelligence, and cognitive computing technologies. The speakers will also engage the participants in a discussion around possible solutions, model best practices and tools to address the challenges to enable future progress today.

OR

Closing the Gap: Risk Insights at the Point of Care

Steward Health Care Network is an accountable care organization with 3,500 physicians, 18 hospital campuses, and 25 affiliated urgent care provider locations. Headquartered in Boston, Steward is community-based and physician-led with more than 23,000 employees across four states. With their participation in the Next Generation ACO program, the MassHealth Medicaid ACO and a growing Medicare Advantage footprint, Steward needs to accurately understand patient risk to develop appropriate care programs and ensure appropriate reimbursement to fund those programs. As documentation requirements for continually increase, Steward's investment in a centralized data infrastructure supported a significant financial return and now helps alleviate provider frustration stemming from having to manage patient details in multiple technology platforms. By pushing HCC coding gaps directly to the EHR for provider review, Steward has entered the next phase of a successful risk program.

OR

Safer Transition from the ER Using Asynchronous Virtual Care

Patients leaving the ED lack available post-acute care options, including care coordination. They're at risk to return to the hospital at significant cost, impacting patient safety, care quality, satisfaction with service and readmissions. Emergency Medicine Consultants sought a solution to engage with patients after discharge which would result in higher levels of patient satisfaction, lower readmissions, and lower system leakage. EMC launched Safe Transitions virtual care in Sept 2016. The post-ED safety program leverages text-first telemedicine to offer no barrier, physician access for patient continuity of care inquiries and ongoing treatment. Broadening the traditional ED visit into a patient-centric, acute care episode improves reliability and builds loyalty between patient and system. This session will describe service adoption and care metrics for this unique post-acute ED telehealth application, as well as future service line plans.

OR

Sutter Health: A Health Data Sharing Case Study

Whether they have sought treatment across the street or across the country, they expect their health data to be available to their physicians and themselves. Sutter Health, a non-profit health system in California, is

pioneering health data sharing by leveraging national-level interoperability initiatives like Carequality. They will share best practices in implementing the leading interoperability framework and other health data sharing initiatives, and insights for the future of health data sharing among and between providers, payers, and patients.

2:30 - 3:30 PM

Concurrent Education Sessions:

Optimizing EHR Governance to Improve the User Experience
After the go live is over, the work of EHR optimization begins. In 2014, Dignity
Health initiated a standardized approach to EHR governance with the goal of
optimizing the User Experience. The results have been phenomenal.
Increased throughput, decreased turn-around-time along with greater provider
engagement and satisfaction. This session will share processes and key
lessons learned.

OR

Inappropriate Opioids, Adverse Outcomes and IT Solutions

Little information exists on the appropriateness of opioid prescriptions and how opioid prescribing practices influence health outcomes and medical costs. Using a nationwide database, we linked pharmaceutical and inpatient/outpatient records for individuals with a medical disability due to carpal tunnel release surgery. We found that 29% of cases were prescribed opioids contrary to evidence-based guideline recommendations. Further, patients prescribed an opioid contrary to guidelines had disability durations 2 days longer and medical costs \$422 higher than patients prescribed an opioid according to guidelines. Inappropriate opioid prescriptions for carpal tunnel release may cost the U.S. \$71 million in medical costs and 124,000 disability days. IT solutions are available to prevent inappropriate prescriptions including drug formularies. This session will discuss the integration of opioid guidelines and a drug formulary within Kaiser Permanente's EHR including physician perspectives of the tool.

OR

Creating a Population Health Strategy that Scales

Attendees will learn how UMass Memorial collects data from diverse sources, integrates it, then analyzes it to create a clear picture of population health needs and value-based care performance. They will also learn how UMass Memorial's office of clinical integration managed the cultural change necessary to move from fee-for-service medicine to value-based care.

4:00 - 5:00 PM

Concurrent Education Sessions:

Behavioral Health: A Launchpad for Enterprise Telehealth

As telemedicine continues to change how providers interact with their patients, organizations are expanding already existing telehealth programs or are investing in telehealth technology. Introducing Behavioral Health services via telemedicine can have an immediate impact on a wellbeing of the patient population. Focusing on one service line, Behavioral Health, this session will walk through how Mass General Hospital (MGH) has successfully implemented and continues to grow their telehealth program - beginning with building a strategy through to growing the patient population. Due to the everchanging regulatory telemedicine landscape, a special focus will be placed on the necessary legal considerations when developing a program. Presenters will also touch on a recent expansion of the program to reach island residents and a tourist population off the coast of Massachusetts as well as the new NQF guidelines and how MGH has embarked on implementing the new

	measures.
	OR
	Using Simulation Training to Speed EHR Adoption Successful EHR implementation hinges on several factors with user training in the top rank. Classroom training, while standard, is perceived as high cost and low value by many medical professionals. While time in the classroom is a component of an overall learning strategy, simulation training is playing an increasing role in higher medical education. MD Anderson, faced with a single go-live to launch our EHR, used simulation training to augment classroom work. We created a simulation environment for our physician faculty, advanced practice providers and fellows. We used simulation to augment classroom instruction for over 2000 providers. This approach was well accepted by our faculty and in post go-live evaluation was seen as an extremely valuable experience. This session will include specific examples of the how this training platform can be used at scale to deliver an enhanced training experience and actionable insight into provider preparation.
	OR
4:00 – 5:00 PM	Five Pillars of a Best-In-Class Cybersecurity Program This session will detail the five vital pillars of building and running an effective cybersecurity program, touching on key best practices undertaking this implementation, barriers you may encounter and how to overcome them, and expected successes. This speaker's expertise combined with more than 25 years of experience will guide audience members from all companies — whether big or small — on the best way to develop and implement a cost-effective, fully functional and adaptable security program. Views from the Top — Leveraging Information and Technology to
4.00 — 3.00 F IVI	Minimize Health's Economic Challenges with HIMSS CEO Hal Wolf
	Description: Economic pressures and demands on the healthcare industry are poised to intensify in the coming decade. The impending silver tsunami partnered with a shrinking economic base are challenging hospitals and providers to continue to deliver services while maintaining quality of care. In facing this full-fledged economic emergency, the health community needs to decide quickly where and how to innovate, invest and implement impactful technologies. Hal Wolf III, President and CEO of HIMSS, will discuss how organizations can leverage the value of HIMSS to address the information and technologies needed to face the next decade of economic uncertainty. Attendees will have the ability to participate in a Q&A session at the end of the session.
4:00 - 5:00 PM	Congressional Forum
	<u>Description:</u> The Congressional Forum session provides the opportunity to hear from key Senate and House of Representatives staffers about the health IT public policy topics that they are addressing as well as the issues where they seek more information and input from constituents.
5:30 - 6:30 PM	HIMSS Communities Carnival
	HIMSS membership include a broad range of professional roles. Take this in- person opportunity to build your peer network, and mingle with volunteers and leaders from HIMSS communities, chapters, committees, task forces, career development, and more.

Nednesday, Ma 7:00 – 8:15 AM	HIMSS Public Policy Leaders Breakfast
-	<u>Description:</u> Breakfast with HIMSS public policy leaders, winners of the HIMSS Nichols E. Davies Award for Excellence in Health Information Technology, and the HIMSS Public Policy Committee.
3:30 - 9:30 AM	State Officials Panel: Health IT Across the States
	Description: State Officials Panel: Health IT Across the States, where state officials will discuss critical health IT public policy topics and how states have attempted to address them with the help of federal agencies, partner organizations, and in collaboration with other states. This session will provide a compelling discussion on the best practices and lessons learned from state action on key health IT policy issues. Views from the Top – Inspiring Digital Health innovation: Transformative
8:30 – 9:30 AM	Views from the Top – inspiring Digital Health Inflovation. Transformative Insights from Across the Globe
	Description: Embracing strategies that drive innovation across the healthcare continuum are critical to improving the efficiency and effectiveness of the patient care experience. For those digital health ecosystems that do embrace change through innovation, their healthcare executives recognize that business drivers like quality, cost, and safety are enhanced through disruptive technologies such as artificial intelligence, machine learning, and virtual reality. From this esteemed panel of internationally-recognized experts, attendees will gain insights into the knowledge, the experiences, and the deep learnings that are so critical to driving change. With a focus on the challenges and the opportunities experienced across the people, the processes, and the technologies, panelists will identify those elements that are so critical to establishing and nurturing a culture of innovation. HIMSS18 Exhibition Hall with live technology demonstrations, presentations and sessions
(When not attending concurrent educational sessions or for non-scheduled time)	Description: Learn about cutting edge health information technology. Experience thousands of health IT products and services on the HIMSS18 exhibit floor. Features the Meaningful Use Experience — a special live demonstration area that lets the viewer experience proven, certified EHR solutions. Also experience firsthand the Social Media Center, HIMSS Interoperability Showcase, The Intelligent Hospital Pavilion and much more.
9:30 AM - 6:00	Interoperability Showcase
PM (When not attending concurrent educational sessions or for non-scheduled time)	<u>Description:</u> Explore a health ecosystem where standards-based health IT enables individuals to securely access, contribute to and analyze their own health data. Learn how current health IT products in the market deliver standards-based interoperability and health information exchange with an interactive learning experience.
10:00 – 11:00 AM	Concurrent Education Sessions:
	Applying Pop Health to Benefit the Mississippi Delta Region The Mississippi Delta Medicaid Population Health Project was launched to drive targeted community, patient and medical provider interventions using modern Population Health Management solutions. The project has two overarching goals 1) Reduce the rate of preterm births by 5%; 2) Reduce the progression of

prediabetes to diabetes by 5%. Delta Health Alliance (DHA) in coordination with the Mississippi Division of Medicaid has been able to combine its electronic health record system with claims data from the State MMIS system. This data has been organized in dynamic registries that Medicaid providers have access to, at the point of care, to identify, score and predict the risks for diabetes progression or preterm birth. Phase 1 of the project is focused in a 5-county region throughout the Delta including: Coahoma, Holmes, Leflore, Sunflower and Washington counties. The study is expanding to a 10-county region in Phase 2. Prediabetes Phase 1 results will be complete by August 2017.

Is Blockchain Right for Good Health?

A great deal of hype has been generated about blockchain's capability of redefining the future of enterprises by solving legacy problems that have impeded optimization and innovation. After the blockchain tsunami in the financial sector, the U.S. healthcare system became prime target number two. This session will cover the advancement of blockchain adoption within the healthcare system, progress on certain applications (health record, medical interoperability), and rapidly emerging areas of need (i.e. data breaches, medical device vulnerability).

11:00 - 12:00 AM

Staff Led VIP Tour of the Interoperability Showcase

11:30 AM – 12:30 PM

Concurrent Education Sessions:

Risk Management Framework for DoD Medical Devices

This session will describe the DoD Risk Management Framework (RMF) requirements, workflows and the Defense Health Agency's role in RMF for medical devices.

OR

Patients as Partners: Embracing Patient-Driven Design and Innovation

Participatory design approaches, such as "design thinking" and "maker movement", involving both patients and caregivers have the potential to create innovative and disruptive health solutions that improve care experiences for everyone. In this high-impact session featuring 3 "ignite talks", design experts will showcase how we can move health care forward in the continuum of design to complement the three concurrent strands fueling the surge of participatory and DIY mentality today: "I want to do it," "I can do it," and "let's do it together".

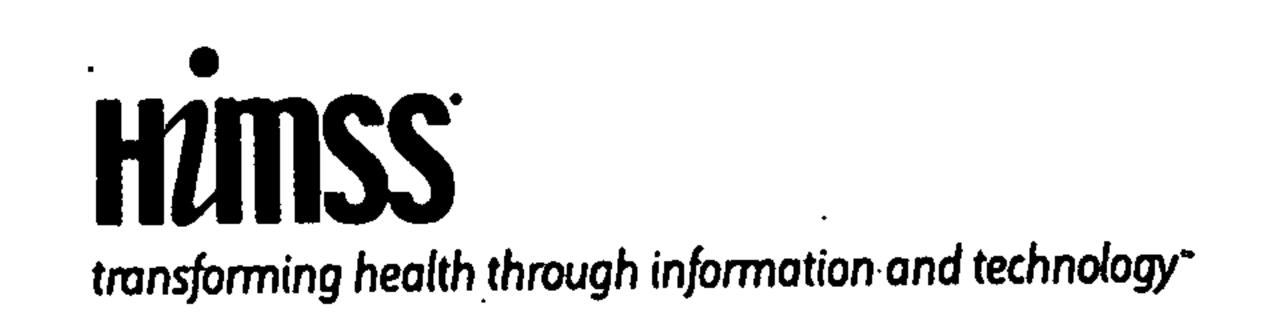

OR

Embracing Longitudinal Person-Centered Care Plans

This session will introduce the concept of longitudinal person-centered care plan and describe current Federal and State regulatory levers in place to support the

	standardized, electronic capture, exchange and sharing of person-centered plans across multi-disciplinary settings to include home and community-based settings (HCBS). This session will describe key financial levers such as the CMS Chronic Care Management Codes, CMS Comprehensive Primary Care Plus Payment Model and CMS HCBS Waiver Program, and technical levers such as the ONC 2015 Edition Care Plan Criterion.
1:00 - 2:00 PM	Federal Health Community Lunch
	Description: A community of HIMSS members and Federal Government employees, coming together for cross-agency information sharing and networking, and to share new ideas on how health IT can be used to improve healthcare delivery by the federal government.
1:00 - 2:00 PM	Concurrent Education Sessions:
	Connected Care: VA, Virtual Health, and the Patient Experience This session focuses on the next phase of VA's digital transformation —the integration of mobile, telehealth and electronic health record (EHR) tools to provide a seamless experience of care delivery that gives Veterans and care teams a cohesive system to access, manage and track health holistically over time.
	OR

	Shared Governance and Analytics Framework Improves Quality In this session, MultiCare will illustrate how a shared governance arrangement built a strategic framework for the use of analytics to deliver not only broader quality outcomes, but also service excellence and affordable care.
2:30 - 3:30 PM	Concurrent Education Sessions:
	Putting Patients First by Reducing Administrative Tasks This session will assess the effects on administrative tasks on physician time, practice and system cost, and patient care due to the increase in administrative tasks, and then to identify recommendations to modify, mitigate, reduce, or eliminate these tasks as appropriate
	OR
	One Size Doesn't Fit All: Local Public Health Informatics Perspectives This session will give an overview of both surveys as well as provide a basic tutorial about public health and local health departments. Issues related to overall informatics capacity of local health departments and the gaps that need to be addressed in the current climate which includes budget cuts, workforce challenges, as well as the implications of national policy efforts.
	OR
	Building a Population Health Strategy that Physicians Love This educational session describes best practices and lessons learned by Alliance

	Cancer Specialists and Shore Quality Partners in their multi-year population health management journey. The speakers share best practices and lessons learned across their physician-led organizations to create a new culture and network initiatives embraced by both providers and practice stakeholders. Once physicians comprehend data's value in transforming patient care, they feel empowered and become strong advocates; they are more motivated to provide customized care, reduce variability and improve outcomes.
4:00 - 5:00 PM	Concurrent Education Sessions:
	The Power of Health IT – Predict, Prevent, Innovate In this session, speakers will review common mistakes to avoid, scenarios to consider and how the secure, connected hospital can enhance the patient, clinician, and operational experience.
	OR
	Improving Quality of Care in Anesthesiology We will discuss the key organizational and technological challenges encountered, and how these challenges were addressed to ensure that NACOR is accessible to anesthesiology groups of all sizes, including small groups with limited IT support and groups that practice in multiple hospitals with multiple EMR vendors. Addressing these challenges has required taking innovative approaches to health data integration and a relentless focus on attaining scalability in business and technical operations. Today, NACOR provides a robust clinical data set that is being used to improve outcomes in anesthesiology.
	OR
	The Cloud Through the Eyes of a Community Health Center CIO This session is geared to providing the answers these hospitals seek. Presented by a healthcare CIO with extensive experience managing IT for community hospitals and medical groups, this session will outline the unique challenges—and unexpected opportunities—smaller organizations will encounter by moving their core applications and protected health information to a secure, HIPAA-compliant cloud.
5:15 – 6:15 PM	Federal Health Community Reception
	Description: Networking event for the Federal Health Community, a community of HIMSS members and Federal Government employees. **No alcohol will be provided or served to Senate staff**
10:45 pm Flight departs Las Vegas	

33 West Monroe St, Suite 1700 Chicago, IL 60603-5616 Tel 312 664 4467 Fax 312 664 6143 www.himss.org

December 19, 2017

Mr. Will Holloway
Office of Senator Orrin Hatch
104 Hart Senate Office Building
Washington, DC 20510

Dear Mr. Holloway:

I am pleased to extend this invitation for you to attend the 2018 Healthcare Information and Management Systems Society (HIMSS) Annual Conference and Exhibition in Las Vegas, Nevada, March 5 – 8 (or March 6 - 9), 2018. This unique opportunity will allow you to learn about the potential and the challenges of healthcare information and technology—including electronic health records, health information exchange, and connected health—to help transform healthcare in America.

HIMSS is a global, cause-based, not-for-profit organization focused on transforming health through information and technology, providing thought leadership, professional development, events, market research, and media services around the world. Founded in 1961, HIMSS represents more than 70,000 individuals, plus over 640 corporations and 450 non-profit partner organizations, that share this cause. HIMSS, headquartered in Chicago, serves the global health IT community with additional offices in the United States, Europe, and Asia. To learn more about HIMSS, please visit our website at www.himss.org. HIMSS North America, a business unit within HIMSS focused on thought leadership in the United States and Canada, serves as the host to U.S. congressional staff at HIMSS professional development conferences.

The HIMSS Annual Conference and Exhibition is one of the healthcare sector's largest conferences. The 2018 HIMSS Annual Conference is anticipated to include over 300 educational events, 1,300 leading health information and technology exhibitors, and over 45,000 professionals from the U.S. and around the world. Attendees include hospital executives, physicians, physician group practice managers, nurses and other healthcare providers, federal and state agency staff, public health agency personnel, state and local government representatives, as well as technology vendors and consultants. To learn more about HIMSS18 and view a detailed conference brochure please visit www.himssconference.org.

During the conference, you may be especially interested in participating in a range of health IT policy events and discussions, including the HIMSS Interoperability Showcase, Cybersecurity Command Center, Connected Health Experience, Intelligent Health Pavilion, Federal Health IT Solutions Pavilion, and many other educational opportunities.

33 West Monroe St, Suite 1700 Chicago, IL 60603-5616 Tel 312 664 4467 Fax 312 664 6143 www.himss.org

For the last ten years, HIMSS has offered paid educational opportunities to selected policy makers to attend the HIMSS Annual Conference to learn about the public policy issues and challenges of the system-wide adoption of health information technology. Consistent with Senate and House of Representatives Ethics Rules, HIMSS is extending to you an invitation to attend HIMSS18 for up to three days (72 hours, excluding travel time). HIMSS does not employ or engage a registered lobbyist, lobbying firm, nor do we serve as a foreign agent.

Upon your acceptance of this invitation, we will provide the necessary documents to submit with your request for approval of privately sponsored travel to the Senate Select Committee on Ethics or House Committee on Ethics, as applicable. Requests must be submitted at least 30 days prior to travel (no later than February 5, 2018). HIMSS will also provide instructions to book your travel in compliance with the travel rules once approval has been obtained.

Paid opportunities to attend this unique educational event are limited, so if you will be able to attend please R.S.V.P. no later than January 12, 2018 to allow enough time for you to submit your request to your Ethics Committee at least 30 days prior to travel. Those responding will be accommodated on a first-come, first-serve basis.

If you have any questions, please feel free to contact me or David Gray at dgray@himss.org or 703-562-8817.

Sincerely,

Samantha Burch
